

[SYNTHETIC DEMO]

Synthetic Wafer-Map Batch Report

Synthetic wafer-map demonstration. Not derived from the SECOM dataset or production Fab data.

All wafer coordinates, lot IDs, and defect patterns in this report were generated by simulations/generate_synthetic_wafer_data.py from a fixed random seed. This report does not represent SECOM sensor analysis results or any real semiconductor manufacturing outcome.

Wafers included: 15

Patterns: CENTER, CLEAN, EDGE_RING, RANDOM, SCRATCH
